

RFID Countdown Reminder Wristbands

Product model	MH-CR03
Product highlights	Countdown time reminder, timeout timing, vibration reminder, LED screen display, RFID, rechargeable, long time standby, multiple straps options
Product picture	

Product Parameters

Countdown time setting	In increments of minutes or half an hour, up to 24 hours
Timeout timing	Countdown ends 30 seconds later, timeout starts, up to 60 minutes
Vibration	Vibration motor reminder
LED screen	Press the screen button to light up and check the remaining time
RFID chip	1K Byte
RFID working frequency	13.56MHZ
Battery charging method	Magnetic charging
Battery charge voltage	DC5.0V
Charging time	120 minutes
Battery type	Polymer Lithium Ion Battery
Battery capacity	200mAh
Standby time	>100 hours
Working hours	24 hours
Wristband strap material	Silicone (various styles of silicone band, magnetic buckle silicone bands, etc.)
Waterproof level	IP68

Functional Operation

Countdown time setting	The countdown time can be set by the special time setter. In increments of minutes or half an hour, up to 24 hours.
------------------------	---

Normal operation	When the wristband connects and induces time setter, the countdown time setting is completed and the countdown begins. Before the countdown time ends, if the wristbands accidentally induce the time setter again, the countdown time will not be affected (except for the reset instruction).
Countdown time suspend	If you want to stop the countdown time midway, you can use time setter to reset it, or connect the charging cable to charge and stop the countdown
Lighting effects	Vibrate the screen to activate the display and check the remaining time; Normal countdown with colorful LED indicator reminders; Yellow light reminder 5 minutes before the countdown ends; Start an overtime timer 30 seconds after the countdown ends, with a blue light reminder; After 1 hour of overtime, the wristband stops working and shuts down to enter standby mode.
Vibration reminder	5 minutes before the countdown time ends, the wristband vibrates 3 times as a reminder, and when countdown time ends, the motor vibrates for 5 seconds as a reminder. When the timeout is 55 minutes, the wristband vibrates 3 times as a reminder, and when the timeout is 60 minutes, the wristband continues to vibrate 5 seconds as a reminder.
Low battery	When the battery power is less than 20%, the red lights will flash reminder.
Charging instructions	The red indicator light is on when charging, and the green light is on when fully charged.
System reset	If an abnormal situation occurs, you can reset the system by connecting the charging cable to charge.
